Science & Engineering*

October 3-4, 2017 | Houston, Texas

ABOUT YOUR INSTRUCTOR

MARK CRONSHAW, PhD is a principal with Resource Economics LLC in Boulder, Colorado. He has years of experience as a resource economist, financial analyst, and engineer. His domestic and international projects have included valuation, gas market development, regulatory review, project planning, cost contingency, and assessment of economic damage. He has taught at the Colorado School of Mines and the University of Colorado. Dr. Cronshaw has a PhD from Stanford, an MBA from Southern Methodist, and MS (Chem. E.) from Caltech and a BA (Chem. E.) from Cambridge UK.

Economics is the primary link between decision-making and profitable operations. This course will explain how to apply tools from petroleum economics which will help in making better decisions for upstream oil and gas opportunities.

This course introduces the economic concepts, strategies, and basic tools utilized in the oil and gas industry which helps you learn how to assess the economic attractiveness of upstream investments in the face of uncertainty. Plus, you will learn to recognize attractive opportunities and avoid bad ones.

Oil and gas companies routinely use economic tools to make decisions about investments and divestitures. This course will both provide background on the upstream oil and gas industry and also introduce you to the economic decision-making tools used to make high stakes decisions in uncertain environments.

COURSE OUTLINE SUMMARY

- Oil and Gas Industry
- Predicting the Future
- Choices, Uncertainties, Objectives
- Conventional and Unconventional Resources
- Productions and Reserves
- Prices and Costs
- Cash Flows
- Discount Rate
- Financial Metrics
- Before and After Tax Economics
- Examples and Exercises

WHO SHOULD ATTEND

Do you need an overall perspective of petroleum economics and production in order to be more productive at your job? If so, this seminar is for you! Past participants have included entry and mid-level managers, landmen, accountants and finance personnel, project managers, government officials, production engineers, finance analysts, geologists, reservoir engineers, regulators, planners, policy analysts, and petroleum industry personnel who would like to develop or increase their knowledge in basic economic analysis, cost estimation, and profitability assessment.

DATES, TIMES, AND LOCATIONS

October 3-4, 2017 in Houston, Texas

The seminar meets from 8:30 a.m. to 4:30 p.m. each day. The event will be held at **Doubletree by Hilton at Greenway Plaza** located at 6 Greenway Plaza East, Houston, TX (713-850-2327).

PROGRAM HIGHLIGHTS

- Understand the essential elements of how cash flow components are estimated using real-life examples
- Economic criteria for screening and ranking projects
- Field development profiles and cash flow streams
- Case studies and current events will be used to illustrate the application of the courses material

WALK AWAY KNOWING...

- ▶ How to organize and frame economic problems in the oil and gas industry
- ▶ Apply and compute basic economic criteria
- ▶ Build and evaluate cash flows
- ▶ Increase your knowledge in basic petroleum economic analysis, cost estimation, and profitability assessment
- ▶ Understand the differences in risk and return of assets
- ▶ Recognize and use basic units, conversions, and classification systems common in the industry

ACCREDITATION INFORMATION

This course qualifies for 1.25 CEUs (Continuing Education Units) and 12.5 PDHs (Professional Development Hours).

Doubletree by Hilton at Greenway Plaza
6 Greenway Plaza East, Houston, TX (713-629-1200)
